

CASE STORY – LUBEMASTER

EUROLUBE EQUIPMENT AB

2010-04

CASE STORY

Eurolube Equipment AB have delivered a large LUBE-Master fluid management system to the new truck workshop at the Boliden Aitik Copper mine in the northern Sweden. The workshop is in operation around the clock, 7 days a week which places great demand on operational accessibility.

The LUBE-Master system controls dispensing from 42 points divided into 14 groups, including four oils and one antifreeze. The system also monitors the tank levels for the four 10000 L tanks. This guarantees twenty-four hour service for the giant mine trucks with a load capacity up to 220 tonnes.

Contact us for more information.

FACTS ABOUT THE TRUCKS

Loading capacity	220 tonnes
Engine power	2337 hp
Crankcase	265 L
Rear Axle Housing	1022 L
Hydraulic Tank	769 L
Transmission Sump	102 L

LUBE-Master SYSTEM FEATURES

- Number of outlets unlimited
 - Number of fluids unlimited*
 - Number of keypads unlimited
 - Number of PIN codes unlimited*
 - Job no validation unlimited, Optional: *integrate with other softwares, contact us for more information*
 - Any outlet can be opened from any keypad in the entire system
 - Simultaneous use at all dispense points
 - Automatic tank control and low level warning
 - PIN code security to prevent unauthorized dispensing
 - Preset volume, frequent volumes can be pre-programmed
 - Hose Reel ID, 1-3 numbers
 - Operator ID (PIN code) 4 digits
 - Job number - 16 alphanumerical
 - Transactions number, running
 - Any part no and name of fluid can be given
 - Multilingual, choose between 23 built-in languages
- * PC required
