

Pump performance charts all models on page 2-7.

Recomended tube sizes

Oil: To dispense Oil, pressure beetween 0,5 up to 5 MPa is requiered, depending of viscosity. Light Oils less pressure (Hydraulic Oils), heavy Oils higher pressure (Gear Oils).

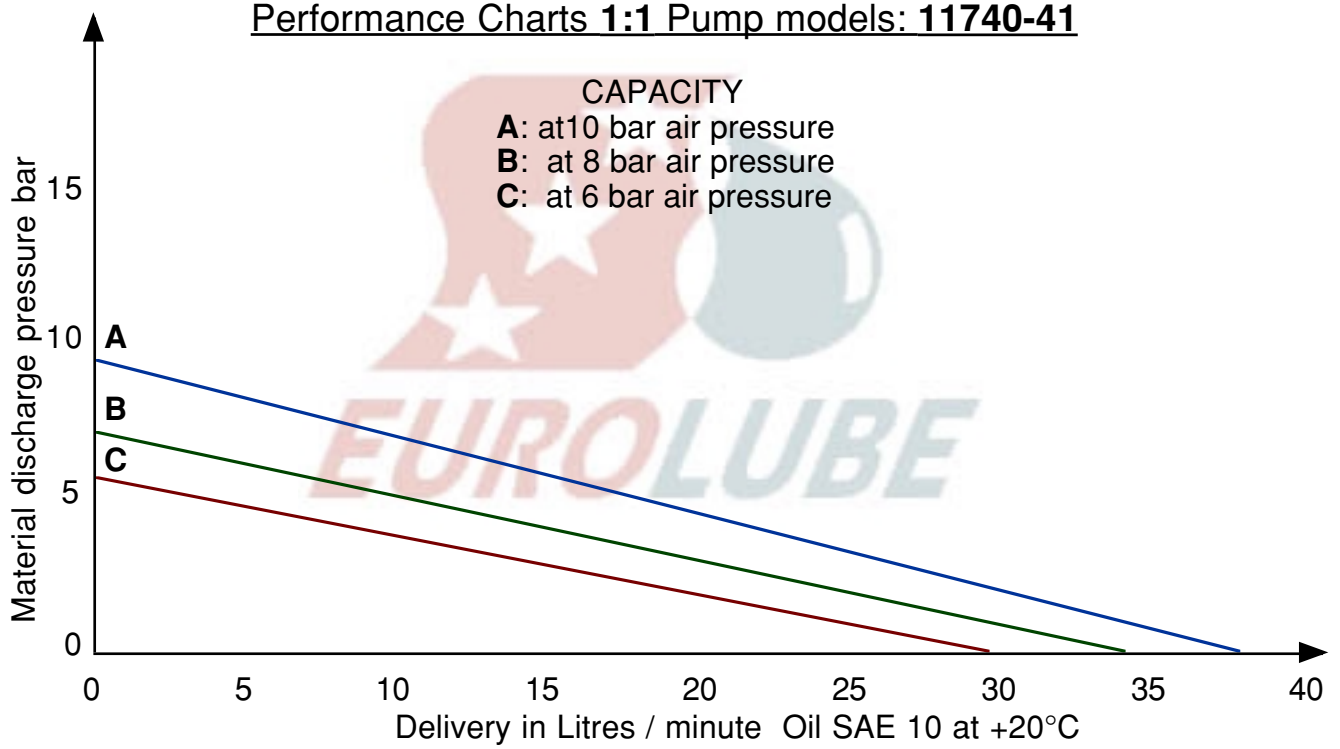

Tube sizes in the below chart is based on a capacity of approx 10 L / min, for Engine Oil SAE 10-40, via 10m 1/2" Hose reel with Hose end Meter.

Grease: To dispense Grease, high pressure is always requiered, 30-50 MPa. Therefor is it necessary to use extra strong tubes.

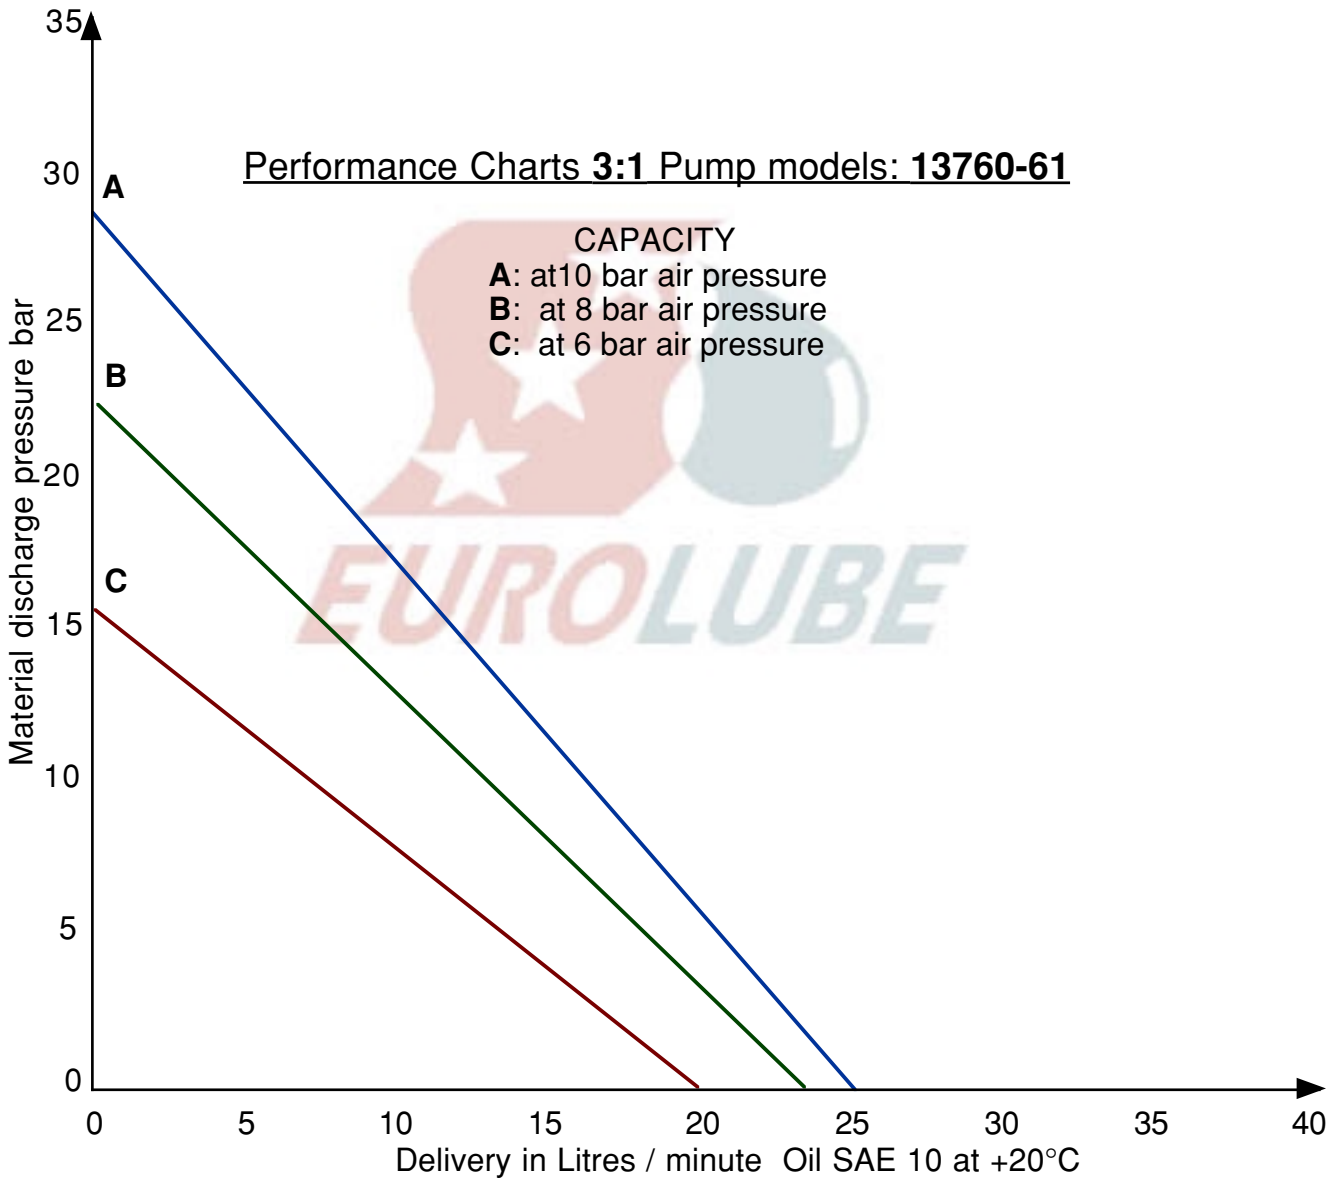

Oil	Pipe Lenght	Diamension
	0 - 50 m	22 x 1,5 mm
	51 - 100 m	28 x 2 mm
	101 - 300 m	35 x 2 mm

Grease	Pipe Lenght	Diamension
	0 - 20 m	20 x 3 mm
	21 - 35 m	25 x 4 mm
	36 - 60 m	38 x 6 mm
	61 - 100 m	50 x 8 mm
