DRIVER GDS

Increased profitability with integration with VOLVO GDS.

We have more than 40 drivers to other DMS systems. Full control of stock levels on oil, antifreeze, washer fluid, etc. Everything will be invoiced, no missed transactions.

For more details on the available drivers, contact us. Eliminates the need for manual handling. Each transaction is sent directly to the customer's DMS-system and the filled fluid is invoiced automatically.

Lube-Master PC-based system is required for connection of driver.
